

ZAIGAR
FINANCE

ZAIGAR.FINANCE

Why Zaigar Finance?

Zaigar is a cryptocurrency rewards marketing company that has been in the market for over 3 years and has more than 30,000 users around the world, having already provided services to large companies in this new economy.

With the aim of always continuing to support the development of the cryptocurrency industry, we are now officially launching our DeFi (Decentralized Finance) platform, Zaigar Finance, implemented within the Binance Smart Chain (BSC) network.

A simple, fast, and secure platform that allows all members of our community to carry out operations with cryptocurrencies in an extremely easy and uncomplicated way.

Furthermore, by adopting well-known strategies in the DeFi universe, it has an economic model capable of generating rewards in crypto assets through Farming and Staking.

To promote the operation and use of the platform, between 07/11 and 07/12/2021 we have pre-sold the ZAIF token, the platform's main asset, where 100% of the quantity offered was sold in less than 20 hours.

Another important landmark was conquered in the first 15 days after its availability, where the ZAIF token had more than 8,000 holders.

Consistently and in line with our history, Zaigar Finance's goal is to create a long-term structure, allowing the community to participate and contribute to the project's evolution so that everyone can benefit.

The platform will feature two different tokens to boost its usage: the ZAIF token, 100% deflationary, designed by its smart contract, and the ZAFIRA (ZFAI), used to reward our platform members.

With this vision, we present some differentials that very well characterize a lasting project focused on the community.

Our differentials

- 1° No pre-mined ZAIF tokens were allocated to the Zaigar Finance team;
- 2° The launch of the ZAIF token was carried out in a pre-sale event where everyone had the opportunity to purchase it for a really very affordable price;
- 3° We are not a project designed to last only a few days and raise funds maliciously. We are Zaigar, a serious platform committed to the work developed since 2018;
- 4° The economic model of our tokens has been designed in a self-sustainable way, allowing constant investment in marketing to promote Zaigar Finance and thus contributing to the continued growth and development of the platform.

ZAIF Token

ZAIF Token is a token developed on the BEP20⁽¹⁾ standard that works within the Binance Smart Chain network.

As Zaigar Finance's main token, ZAIF allows access to all functionalities and use cases made available on the platform.

(1) <https://academy.binance.com/en/glossary/bep-20>

Token Information

Name: Zaigar Finance
Ticker: ZAIF
Maximum quantity: 10,000,000 ZAIF
Transaction fee: 5%

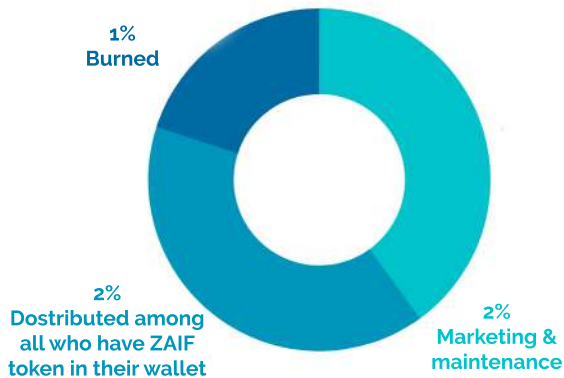

Of the total of 10 million initial ZAIF tokens, 90% were offered in pre-sales, with 9% distributed in airdrop and 1% reserved for strategic partnerships.

ZAIF Token Economy (Tokenomics)

ZAIF token is designed to be self-sustaining, allowing for constant investment in project growth, which is why every transaction performed with the token has a 5% fee.

Understand how the 5% fee per transaction is divided

2% are proportionally distributed among all who have ZAIF token in their wallet;

2% are used to promote marketing actions and pay for the maintenance of the platform;

1% is burned, thus helping to create scarcity and contributing to the stability of the token on the open market.

Furthermore, after the official launch of Zaigar Finance, 25% of the amount collected from fees in the farming and staking functions of the platform will be used for the acquisition and burning of ZAIF tokens for a minimum period of 120 days, thus contributing to the increase in scarcity and possible valorization of the token.

ZFAI Token

The **Zafira** (ZFAI) will be the token used to reward our community members who use their ZAIF tokens in the Farming and Staking functions of the platform.

Unlike ZAIF, in the ZFAI token - also implemented in the BEP20 standard of the Binance Smart Chain network - there will be no transaction fee (0% fee), allowing all gains on the platform to be 100% attributed to our community members. Furthermore, when acquiring or transferring these tokens, the same exact amount of tokens will be received by the recipient.

With the adoption of this strategy, we have greatly facilitated the adoption of ZFAI tokens in payment systems, features offered by service providers, and even more importantly, its availability on exchanges.

Although the ZFAI token does not have a native burning function implemented in its smart contract, as implemented in the ZAFI token, 25% of the amount collected from fees from the platform's farming and staking functions will be used for the acquisition and burning of the ZFAI token by a minimum period of 120 days.

As part of our mission, always focused on the benefits provided to members of our community, new strategies will be developed and adopted with the aim of boosting the growth of our ecosystem and promoting the scarcity and possible appreciation of the assets made available, which will be timely announced in our communication channels.

Token Information

Name: Zafira

Ticker: ZFAI

Pre-mined tokens: 21,000,000 ZFAI

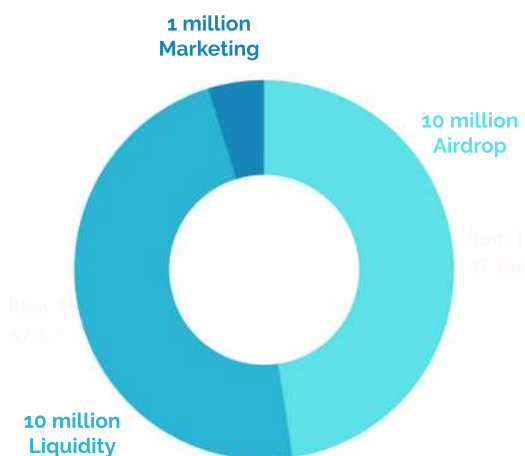

Maximum quantity: 180,000,000 ZFAI

Transaction fee: 0%

Tokens per block: 4 ZFAI

Time per block: 3 seconds

Distribution of pre-mined tokens

Liquidity: 10 million tokens will be used to provide liquidity in PancakeSwap⁽²⁾, and this liquidity will be blocked for 1 year;

Airdrop: 10 million tokens will be distributed to current ZAIF⁽³⁾ token holders.

Marketing: 1 million tokens will be used to implement and drive a strong marketing campaign with a global reach.

Airdrop ZFAI

Keeping our mission to always offer the maximum benefits and convenience to our community, and especially to honor all those who believed and continue to believe in the project, all those who on **08/05/2021** 20:00 UTC have a balance equal to or greater than 1 ZAIF in your wallet, or deposited in the Farming and Staking functions at **Zaigar Finance**, will be eligible to receive the same amount in **ZFAI tokens (Zafira)** on 08/20/2021 at no additional cost, 100% free. That is, someone who has 50,000 ZAIF on 8/05/2021, according to the terms and conditions stated above, will receive 50,000 ZFAI in the **airdrop** on 8/20/2021.

ZFAI Token Economy

-0% transaction fee;

-With the launch of the ZFAI token, liquidity of 20 BNB will be added to the platform, which will be blocked for 1 year;

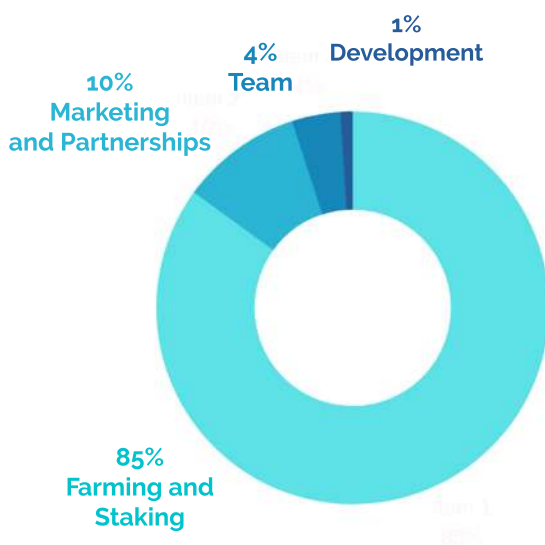

-25% of the amount collected from fees arising from the platform's farming and staking functions will be used for the acquisition and burning of the ZFAI token for a minimum period of 120 days.

(2) <https://pancakeswap.finance/>

(3) Terms and conditions apply.

How will the ZFAI token mining process work

With the launch of the Zaigar Finance platform, we will also have the beginning of the ZFAI token mining. From that moment on, 4 ZFAI will be generated per block of the BSC network, with a total of 115,200 ZFAI per day.

Distribution of mined ZFAI tokens

Farming and Staking: 85%

Marketing and Partnerships: 10%

Team: 4%

Development: 1%

Next Steps

Buy with credit card and pay with ZFAI

As part of the ZFAI token adoption strategy implemented by the team, in partnership with ZCore Finance, the token will be made available for use on the ZeFi Card,⁽⁴⁾ a virtual credit card.

With this, it will be possible to use the ZFAI⁽⁵⁾ token in everyday situations, such as shopping and using services such as Uber and iFood.

(5) The availability date will be disclosed in our communication channels in due date.

Roadmap

May 2021

Defi project design and conception

July 2021

- ZAIF token pre-sale;
- Airdrop ZAIF;
- Availability on Pancakeswap;
- Added blocked liquidity;
- Campaign to add Private Liquidity;
- Bitblock partnership.

August 2021

- Launch of the Zaigar Finance platform;
 - Exchange launch;
 - Audited by TechRate;
 - AirDrop ZFAI;
- Application for listing on Exchanges;
- Application for display on CMC & Coingecko;
- International Marketing Campaign

3Q onwards

- Availability on the ZeFi virtual credit card ;
- Increased presence in media social via Youtube & Tiktok;
- Addition of functions on the platform;
- Launch of Vault;
- Announcement of Strategic Partnerships.

Marketplace

In order to equally promote the development of both tokens implemented in the platform, it is part of our strategy to seek to make the ZFAI token available in the market once ZAIF token has been made available.

To this end, the Zaigar Finance team is already in contact with several exchanges with good daily trading volume (+50M USD) for the inclusion of our tokens.

How to earn with Zaigar Finance

- 1° Acquiring your tokens and waiting for a possible recovery;
- 2° Accumulating tokens in your wallet and receiving part of the fee every time someone performs a transaction with ZAIF tokens;
- 3° Applying your tokens to our Staking feature and earning a share of the new mined ZFAI tokens;
- 4° Using the Farming feature, contributing to the liquidity of tokens and earning new LP tokens⁽⁶⁾.
